

Danzer Group Responsible Procurement Policy

Danzer Group commits to source timber from own and third party forests in an environmentally responsible manner. Our main goal is to procure only from sustainably managed forests.

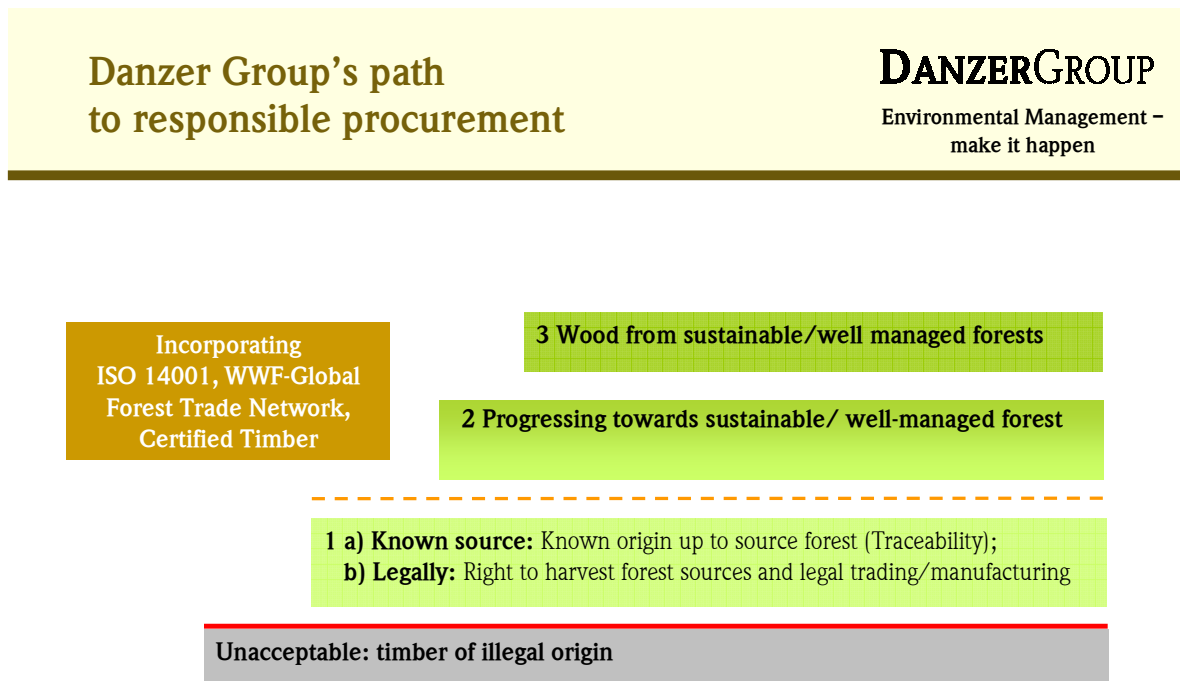

Legal compliance with the relevant forest and environmental legislation of the country of origin and with relevant international treaties will be ensured.

Danzer Group implements this policy

1. gradually by a process of continual improvement, adapted to the situation of our own companies and that of our suppliers;
2. credibly by transparent systems that ensure traceability and performance;
3. reliably by using internationally recognized standards for good forest management
4. accurately by assessing the countries of origin and if necessary each single supplier.

This process is continuously and independently certified by qualified third party auditors.

The implementation of the policy is illustrated in the ladder approach below:

This policy was decided by the Executive Board of Danzer Group, November 22, 2007. It has been derived from the overall policy Danzer Group's Commitment to your safety, to our health, and the habitat we share.
